SUMMARY

Computer Science undergraduate at Walchand College of Engineering building full-stack, desktop, mobile and ML-based systems (Python, TypeScript, Dart, C++). Shipped a Play Store app with 600+ users, a Windows/Linux desktop PDF editor and a live AI testing platform; projects span cybersecurity, log analysis and computer vision. Smart India Hackathon 2025 National Finalist, SmartCops Hackathon 2025 Winner, and co-inventor on a granted UK design patent and a filed Indian design patent.

EDUCATION

Walchand College of Engineering, Sangli (Govt. Aided Autonomous Institute) 2024 – 2028 (Expected)
B.Tech, Computer Science and Engineering | CGPA: 7.51

SKILLS

Languages: Python, C++, JavaScript, TypeScript, Dart, SQL, HTML/CSS
Frameworks & Libraries: React, Node.js, Express, Flask, Flutter, Electron, Tailwind CSS, Scikit-learn, OpenCV, Playwright, REST APIs
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Machine Learning
Tools & Platforms: Git, GitHub Actions, Docker, Linux, Firebase

PROJECTS

- **Re-Edit PDF** *(Electron, React, TypeScript, pdf.js, Tesseract.js)* – Built a Windows/Linux desktop PDF reader and editor with text editing, annotations, form filling, signatures, page management and offline OCR; shipped installers (.exe, .deb, .rpm, AppImage) with 49 automated tests and a GitHub Actions packaging workflow. [GitHub]
- **BugScout – AI QA Testing Platform** *(React, Node.js, Playwright, Llama 3.1, Firebase, Docker)* – Generates and runs browser tests from a URL, explains failures in plain English, and adds accessibility audits, Lighthouse performance reports and shareable reports; deployed live. [Live demo] [GitHub]
- **Phishing Links Detector** *(Python, Flask, Scikit-learn)* – Extracts 11+ URL features and compares Logistic Regression, Random Forest and Gradient Boosting, reaching 85% accuracy on real-world datasets; Flask web app with an optional sandbox-analysis mode. [GitHub]
- **FlashLyrics** *(Flutter, Dart)* – Android app that detects the playing song from any music app via MediaSession and shows synced, tap-to-seek lyrics from 6 sources with an offline library; published on Google Play Store with 600+ users. [GitHub]
- **Portable Log Analysis Tool** *(Python)* – Built a cross-platform tool for air-gapped networks that processes Syslog, Apache and Windows logs, using statistical and ML techniques to speed up anomaly detection.
- **Grain Size Analyzer** *(Python, OpenCV)* – Offline GUI and CLI tool that measures metal grain size from microstructure images using edge detection and contour analysis, following the ASTM E112 standard. [GitHub]
- **Renewable Energy Prototypes** – Designed a highway wind-energy system powered by vehicle air draft and a hybrid solar-wave energy prototype for large water bodies.

INTERNSHIP EXPERIENCE

TechXcel Solutions, Pune – Summer Intern Jun–Aug 2025; May–Jul 2026

- Developed a hotel management system in HTML that improved record management and automated billing and order tracking (simulated business scenarios).
- Built a Python-based wealth monitoring system to track deposits and maturity dates, reducing manual tracking effort by ~40% (simulated use case).

LEADERSHIP & FELLOWSHIP

Young CXO Fellowship Program – Walchand College of Engineering, Sangli 2026

- Selected for WCE's inaugural 9-month leadership and mentorship fellowship, mentored by alumni founders, executives and industry leaders in leadership, entrepreneurship and problem-solving.
- Batch Coordinator for a group of 15 fellows.

ACHIEVEMENTS

- **Finalist, Smart India Hackathon 2025** (IIT Jammu; top teams among 120,000+ participants) – solved an NTRO problem statement by designing a portable log analysis tool for air-gapped networks to detect anomalies and security threats.
- **Winner, SmartCops Hackathon 2025** (Maharashtra Police) – developed an ML-based phishing link detection system to identify malicious URLs.
- **Co-Inventor, UK Design Patent No. 6529823** (granted) – "AI-Driven Data Privacy Monitoring Device".
- **Co-Inventor, Indian Design Patent Application No. 202641115318** (filed) – "AI-Based Intrusion Detection System for Network Security".
- **Participant:** National Road Safety Hackathon 2025 (NHAI & HOAI; among 21,500 teams); Adobe India Hackathon (Round 1: MCQ + Coding); Technocrak 2024 – Crimespect (EESA, Shivaji University).
- **Winner, Bhagavad Gita Recitation** (Sringeri) – memorized and recited the complete scripture at age 9; awarded Rs. 21,000.

CERTIFICATIONS

- Elite Certification in Understanding Incubation and Entrepreneurship – NPTEL, IIT Madras (2025)
- Elite Certification in Corporate Social Responsibility – NPTEL, IIT Kharagpur (2026)
